Our Environmental Chemistry research group was founded in 2012 with the support of the Széchenyi István University Main Research Direction Grant. In collaboration with the Environmental Protection Laboratory (Győr) our research group is focused on the chemical analysis of inorganic and organic pollutants in environmental samples (water, sediment, air).

**Head of research group:**

Dr. Andrea Szabó Nagy associate professor (E-mail: nszabo@sze.hu)

**Members of research group:**

Dr. Zsófia Csanádi assistant professor, Gábor Simon assistant professor, János Szabó technical assistant
